

IHP Workgroup Status Report

Treat Goal: Treat people with HIV rapidly and effectively to reach sustained viral suppression.

In Attendance: Redacted

Meeting Date: June 28, 2024

Submitted By: Community & State Chairs

See updated goals. Red for proposed new language. Strikethrough for proposed to remove.

Objective	Data Updates	Successes	Problems	Next Steps
<p>1a: In five years, increase the number of healthcare systems prescribing rapid ART by two</p> <p>1b: In 5 years increase the number of providers prescribing long-acting ART medications by two.</p>	<p>Will check in with Linkage to Care to see if we can receive answers to our data question – How many Health Care Systems are currently prescribing ART?</p>			<p>To support this our committee proposes that we add another goal – ‘to increase # of providers who are prescribing long-acting ART medications: we know it is Dartmouth, Concord ID and Wentworth Douglas.’</p>
<p>Increase PLWH who are in care Decrease the number of PLWH who have not seen an HIV provider in 12 months, by 5% in five years.</p>	<p>Will reach out to HIV Epidemiologist to request data around # people who have not seen their doctor within 12 months.</p>			<p>-Update the goal with verbiage listed below. -Analyze preliminary data with the committee</p>

IHP Workgroup Status Report

Treat Goal: Treat people with HIV rapidly and effectively to reach sustained viral suppression.

<p>In five years, increase contracts and/or partnerships with wraparound service providers (For example: dental, mental health, transportation, housing, substance use) in NH underserved communities by 5%.</p>	<p>-Pull together list of contracts and partnerships from NH Care Program. -Bring 2 pages from previous IHP info with data from this goal to the next meeting to discuss.</p>			<p>-Update the goal - TAKE OUT UNDERSERVED Communities for Goal 3 and add in (these services include but not limited to: Dental, Mental Health and Transportation, Substance Abuse, Housing). -Compile a list of partnerships and contracts</p>
---	---	--	--	---

NOTES:

Additional notes for Goal 1:

- Contact info for data – Linkage to Care Program
- Consider using Medicaid Claims for additional data

Additional notes for Goal 2:

Goal 2A - Increase PLWH who are in care by 5% in 5 years

Goal 2B - Our workgroup is proposing that this goal should read: "Decrease the number of people who haven't seen their doctor in more than 12 months" instead of how it is currently written.

Additional notes for Goal 3:

- Define underserved communities – as a committee we felt that the state population is under served therefore propose we take that out.
 - o There is also the Health Care Professional Shortage Areas designation and a map this might support the underserved piece.

Treat Goal: Treat people with HIV rapidly and effectively to reach sustained viral suppression.

Resources:

<https://bhw.hrsa.gov/workforce-shortage-areas/shortage-designation#hpsas>

<https://data.hrsa.gov/tools/shortage-area/hpsa-find>

- which parts of the state are we lacking – wrap around + services?

- next steps: – list of contracts and list of community site visit from monitoring tools and/or resource evaluation in the IHP – Resource inventory could be reviewed as well.

Next Meeting:

- August 23rd – Cancelled – New Date: Friday, September 13th same time 3:00 – 4:30

- Keep October 25th meeting

- December 27th meeting – Cancelled and rescheduling for January 10th 3:30 – 4:30
